GENERAL DETAILS AND BENEFITS

The RC direct indirect fixture is the perfect office lighting solution for ambient light coverage of the room and ceiling.

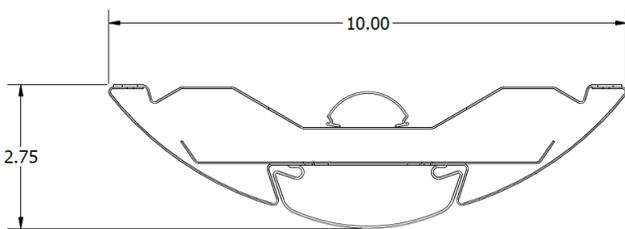

This fixture utilizes two sets of LED strips to light above and below the suspended fixture. Acrylic lenses are used on both sides to create the optimal light distribution.

The RC direct indirect is capable of suspended end-to-end row mounting for lighting applications in large spaces.

This fixture is ideal for architectural builds that want to highlight an entire space including the ceiling.

Cable suspension and pendant mounting are both functional mounting methods for this fixture.

Contact customer service with any further questions about the RC direct Indirect fixture and available controls packages.
